

Global Entertainment Technology, Inc. ("GET"), as the main component of its **"GET CONNECTED"** projects proposes to utilize the service of Chris Romine and his wireless group in Oklahoma to form the foundation for its **WISPLINX** division. That will allow **GET** to design, install, maintain and manage community-converged wireless/satellite infrastructure systems under the tradename **"WISPLINX."**

The overall management and back office services will be provided by **WISPLINX** hires with specific project management and specialists on site in each community being built out

WISPLINX will be a Master Value Added Reseller various outside services as an adjunct to its own wireless services and buildouts in rural areas where **GET** will be building out Internet Radio stations for communities, sub-divisions and even individuals.

Additionally, **WISPLINX** can also be involved with the development and marketing of rural solar panel energy creation for residences, farms and small businesses that will tie to its wireless services in markets that **GET** will serve.
